

Aviator Game Rules – The Complete Guide (2025 Edition)

1. Overview

The **Aviator Game** is an interactive, real-time multiplier game developed by **Spribe**. It's based on a simple concept: a small airplane takes off, and as it flies, a multiplier keeps increasing.

The player's challenge is to **cash out before the plane flies away** — if you succeed, your bet is multiplied by the shown value; if not, you lose that round.

Unlike slots or roulette, Aviator combines **real-time decision-making, probability, and timing** — giving it a unique social and strategic element.

2. Game Objective

The main goal is to:

- Place a bet before each round begins.
- Watch the plane take off as the multiplier rises.
- **Cash out** before the plane disappears off-screen.

The longer the plane flies, the higher the multiplier — but once it flies away, all bets still in play lose.

3. How the Game Starts

1. A new round begins every few seconds.
2. Players can **place their bets** before the countdown ends.
3. Once the plane starts flying, the multiplier increases continuously from **1.00x** upward.
4. The flight lasts a random amount of time — determined by a provably fair algorithm.
5. If you **cash out** before the plane flies away, your winnings are calculated as:

$$\text{Winnings} = \text{Bet Amount} \times \text{Multiplier at Cash Out}$$

4. Controls and Gameplay Interface

A. Betting Area

- Enter your **stake amount** (the amount you want to bet).
- You can **place up to two bets simultaneously** for flexible strategies.

B. Auto Bet

Automatically repeats your last bet in each round — ideal for consistent play or testing strategies.

C. Auto Cash Out

Lets you set a target multiplier.

Example: if you set **Auto Cash Out = 2.00x**, the system will automatically stop your bet once the multiplier hits that point.

D. Manual Cash Out

Tap or click the “**Cash Out**” button any time during the round to secure your winnings at the displayed multiplier.

5. Aviator Game Rules

Rule 1: Bet Timing

All bets must be placed **before** the plane takes off.
Once the flight starts, no new bets can be made.

Rule 2: Single or Double Bets

You may play with **one or two active bets** per round.
Each bet operates independently — you can cash one early and let the other run longer.

Rule 3: Cash Out Mechanism

You must cash out before the plane flies away.
If you fail to do so:

- The round ends immediately.
- The bet amount is lost for that round.

Rule 4: Random Flight Outcome

Each round's crash point (when the plane flies away) is **randomly generated** using Spribe's **Provably Fair System**, ensuring results can't be manipulated.

Rule 5: Payout Calculation

Your payout equals your stake multiplied by the multiplier at which you cashed out.

Example:

If you bet ₹100 and cashed out at 3.5x →

Payout = ₹100 × 3.5 = ₹350

✔ **Rule 6: Network & Disconnection**

If you lose internet connection after placing a bet, the system will **auto cash out** at your pre-set multiplier (if enabled).

Otherwise, the round result will still be recorded and visible in your history.

✔ **Rule 7: History & Transparency**

Every round's result (multiplier and winner list) is shown in the **game history** tab.

You can verify fairness using the seed values and hash provided in the "Provably Fair" section.

▣ 6. Key Game Features

Feature	Description
Provably Fair System	Every result is generated using cryptographic randomization to prevent tampering.
Double Bet Mode	Play with two bets at once — great for mixed risk strategies.
Live Chat	Engage with other players and view live statistics.
Statistics Panel	Displays recent multipliers, longest flights, and big wins.
Demo Mode	Free practice version for learning the mechanics safely.

▣ 7. Multipliers and Odds

- The multiplier starts at 1.00x and can theoretically reach **infinity**, though it usually crashes before 100x.
 - Multipliers above 50x or 100x are rare but possible.
 - No two rounds are identical; crash points vary unpredictably.
-

▣ 8. Learning Strategies (Educational Purpose Only)

These are safe, practice-based techniques for **understanding gameplay**, not real-money advice.

1. **Low-Risk Play:** Cash out early (1.2x–2.0x) to learn pacing.

2. **Split Strategy:** Use two bets — one safe, one risky.
 3. **Observation Mode:** Watch multiple rounds to identify flight patterns.
 4. **Set Auto Cash Out:** Avoid manual hesitation and emotional play.
 5. **Budget Management:** Predetermine your total session amount.
-

9. Responsible Gaming Guidelines

Aviator is designed for **entertainment**.

Follow these safety principles:

- Set **deposit and time limits** before playing.
 - Never chase previous losses.
 - Treat the game as fun, not income.
 - Use demo or free modes if available.
-

10. Example Round Walkthrough

Step	Action	Multiplier	Result
1	Bet ₹100 before takeoff	1.00x	Plane lifts
2	Watch multiplier rise	2.00x	Still flying
3	Cash Out	3.00x	You win ₹300
4	Plane flies away	3.75x	Round ends

11. Terms of Fair Play

- All results are generated by **Spribe's random number system**.
- Manipulation or interference is not allowed.
- Only verified and licensed platforms should be used to access the game.
